

BRIO EVO: One idea, two designs.

The evolution of handles for sliding windows and sliding doors.

- **Brio** and **Brio Mini**, the wide range of recessed handles for Aluminium sliding windows and doors by **Giesse**, have just got an update.
- **Brio Evo** takes all the qualities that made **Brio** great (fast simple assembly and a tamper – proof system) and goes one step further by adding a brand new square design to the range as well as a redesigned ergonomic recessed handle for greater ease of use.

A COMPLETE RANGE

Brio Mini Evo

The grub screw in **Brio Mini Evo** is centrally located for sturdier fixing

Brio Evo

Three different backsets available (E)

Standard L XL

3 HANDLES

Rounded Design small

Rounded Design big

Square Design big

BRIO EVO THE RANGE
